

Custom Software Development Proposal

Executive Summary

TechSolutions Inc. proposes to develop a custom enterprise resource planning (ERP) system for MegaCorp Ltd. This cloud-based solution will integrate finance, HR, supply chain, and customer relationship management into a single platform.

Problem Statement

MegaCorp currently operates with 7 disconnected legacy systems, resulting in data silos, manual re-entry errors, and 3+ hours of daily reconciliation work per department. This costs an estimated \$450,000 annually in operational overhead.

Proposed Solution

We will deliver a microservices-based ERP built with Python (FastAPI), React, and PostgreSQL, hosted on AWS. Key modules: Finance & Accounting, HR & Payroll, Inventory Management, CRM, Reporting & Analytics.

Deliverables

1. Requirements analysis document
2. System architecture design
3. Working ERP with all 5 modules
4. Data migration from legacy systems
5. User training & documentation
6. 12 months post-launch support

Timeline

Phase 1 - Discovery & Design: 6 weeks
Phase 2 - Core Development: 16 weeks
Phase 3 - Testing & QA: 4 weeks
Phase 4 - Deployment & Training: 2 weeks
Total: 28 weeks (7 months)

Budget

Discovery & Design: \$35,000
Development: \$180,000
Testing: \$25,000
Deployment: \$15,000

Annual Support: \$40,000
Total Project Cost: \$255,000 + \$40,000/year support

Team

Project Manager: Sarah Chen (PMP certified, 10 years)
Lead Architect: David Kim (AWS Solutions Architect)
Senior Developers: 3 × full-stack engineers
QA Engineer: 1 × ISTQB certified tester
UX Designer: 1 × Figma-certified designer

Terms & Conditions

Payment: 30% upfront, 40% at Phase 2 completion, 30% at go-live.
IP: All custom code is owned by MegaCorp upon final payment.
Warranty: 90-day bug-fix warranty post-launch.
Confidentiality: NDA in place prior to project start.
